

Suvil AudioChat BT "Music on your Lapel"

AudioChat BT from Suvil Technologies Corp. is a Bluetooth wireless device which can be used for the following:

- a) for listening to stereo music from mobile phones with Bluetooth A2DP technology.
- b) as a hands-free device for a mobile phone.
- c) for listening to stereo music from your computer up to 10 metres away.
- d) for wireless videoconferencing with Skype or MSN.
- e) For listening to music from other devices with an analogue stereo audio output (TV, MP3, DVD Player, Hifi, Radio, etc)*.

While you listen to stereo music from different Bluetooth devices or make wireless video conference calls, you can accept or reject phone calls at the same time if you have your Bluetooth mobile phone synchronised.

AudioChat BT has a mini LCD that displays the battery level, incoming phone number when in synchronisation mode, etc.

AudioChat BT also comes with an LED that indicates when it is switched on, charging or synchronised with another Bluetooth device. It also has keys for on/off, start/stop music, and connection/disconnection with a mobile phone.

The Suvil **AudioChat BT** costs **€24 (\$29)** incl VAT.

*If you have a Bluetooth A2DP device with a 3.5 mm analogue connector.

Suvil AudioChat BT "Music on your Lapel"
