

Suvil "I-T" Click, Click RF

"The Mouse you control with your Finger and Thumb"

The "I-T" Click, Click RF, from Suvil Technologies, is an optical "Radiofrequency" mouse operated with the index finger and thumb. The index finger presses the top button and is equivalent to the left button on a conventional mouse, while the thumb controls the side button and is equivalent to the right button.

The "I-T" Click, Click RF has been specially designed and patented. It is highly stylised with specially designed contours for an easier and more comfortable grip, lessening hand fatigue in the user.

The side button on the mouse is located a little behind the top button to match the natural position of index finger and thumb.

Also, when you put your hand on the mouse, the index finger moves naturally from the top down, while the thumb presses from the outside in to make a click.

Placing the buttons this way gives a highly stylised feel to the mouse.

There are two energy saving modes: The first is the "rest" mode, which is activated automatically after 30 seconds without use. The mouse only consumes 0.4 mA in this mode, and can be returned to normal use by moving it or clicking on the top button.

After 5 minutes without use, the "I-T" Click, Click RF goes into "sleep" mode, with a consumption of only 0.08 mA. Clicking on the top button brings it back into normal use.

The "I-T" Click, Click RF has a resolution of 1.000 CPI. There is a USB cable to recharge the battery from a laptop computer and an extension USB cable (male/female) if using a desktop.

The Suvil "I-T" Click, Click RF costs **€19** (incl VAT), **\$23**.

Suvil "I-T" Click, Click RF

"The Mouse you control with your Finger and Thumb"

Product Specifications:

Type: Optical Radiofrequency Mouse. Styled and shaped with buttons on the top and at the side.

Sensor: Optical PAN3204 1000 CPI.

Radiofrequency Chipset: Sonix 26L34.

Operating Frequency: 2.4 - 2.4835 GHz.

Operating distance: Up to 10 m (withouth obstacles).

Precision: + 95%.

Battery: Li-ion 400 mA.

Recharging the battery: Via USB.

Cable length: 78 cm (mini USB male to USB male).

Extension cable length: 1 m (USB female to USB male).

ON-OFF Switch/Synchronisation: At the bottom of the mouse.

Mini LED: Blue (battery charging). Located on the side of the mouse.

Dimensions: 11.2 x 38.3 x 24.8 mm.

Weight: 41 grs.
